Experience

Simbiotik Technologies Sdn. Bhd

Associate Software Developer

Gujarat, India

06/2025 - 06/2026

DASH Parking:

- Developed and maintained backend modules using **Node.js/NestJS** and **MongoDB**, implementing REST APIs, request validation, authentication, and authorization workflows.
- Built and integrated **8+** Angular modules and dashboard workflows for a Parking Management System supporting **1,000+** daily parking transactions and real-time centralized monitoring.
- Integrated and debugged **55+ REST APIs** across frontend and backend services, resolving issues related to routing, payload mapping, state management, and data rendering.
- Worked with **Redis** and **WebSocket** based workflows to support real-time parking activity updates and backend service communication.
- Implemented Season Pass management workflows including renewals, expiry tracking, validity calculations, payment handling, and status management.
- Improved frontend responsiveness and API interaction flows by optimizing Angular component rendering and state management.
- Tech:** Node.js, NestJS, TypeScript, Angular, MongoDB, Redis, WebSockets, REST APIs

DMS (Dealer Management System):

- Worked on a large-scale Dealer Management System (DMS) serving **100,000+** customers, developing and maintaining frontend modules integrated with Node.js-based backend services.
- Resolved **70+** frontend and API integration issues across operational modules, improving workflow reliability and reducing recurring application errors.
- Debugged cross-service API workflows by tracing request lifecycles and data flow across interconnected backend modules to resolve recurring functional issues.
- Tech:** Angular, TypeScript, HTML5, Tailwind CSS

Projects

Ticket Management System

<https://github.com/darshanmehta28403/Ticket-Management-System>

- Designed and developed a full-stack Ticket Management System using **Node.js/NestJS**, Angular, **PostgreSQL**, Prisma ORM, Redis, and WebSockets for ticket creation, assignment, tracking, and status management.
- Implemented Redis **caching** and WebSocket-driven real-time ticket updates to improve synchronization and reduce unnecessary API requests.
- Built REST APIs and backend modules using PostgreSQL and **Prisma ORM** for ticket tracking, assignment, status management, and user workflows.
- Implemented **JWT**-based authentication and role-based access control (**RBAC**) for secure user access and permission management.
- Built Angular dashboards with reusable components, server-side pagination, filtering, and API integration for efficient ticket management.

Skills

Languages: JavaScript · Typescript

Backend: Node.js · Express · NestJS · JWT Authentication

Database: MongoDB · PostgreSQL · Prisma ORM

Caching & Realtime: Redis · WebSockets

Tools: Github · Docker · Postman

Education

Darshan University

Bachelor of Engineering (CSE)

09/2022 - 05/2025
